STATE PAIR COMMITTEES.

Several Meetings Last Night-The Euter-prise Getting Into Shape. Last evening several of the committees having in charge the detail work of the State Fair met and accomplished considerable work. All the members seem to be taking cuthus astic stock in the enterprise and the indications are that Wheeling will have a fair that will do credit to the State have a fair that will do credit to the State at large and give an impetus-to every interest in it. By to-morrow evening it is probable that quite a number of new committees will be completed and as they are largely composed from the over three hundred atockholders their publication will be a matter of pretty general interest. The outside world seems to be taking notice of the preparations now going, and the fact that Wheeling has not had a fair for so many years will excite a pretty general. many years will excite a pretty general desire to make exhibits among manufact-urers and others. Already a number of applications have been received and there is no doubt but that every inch of available apace will be taked early. One Springfield firm alone, which manufactures agricultural implements, says that it will make an exhibit, which will be a sort of a fair of itself. The fair pospects are certainly flattering. tainly flattering.
